IDENTIFICATION OF THE OPTIMAL STRATEGY FOR FLOW CONTROL IN THE NIPIGON RIVER

TABLE OF CONTENTS

I. Introduction	(1)
II. Systems Approach for the Identification of Optimal Strategy of Flow Control	(4)
1. Recreation Submodel	(4)
2. Fishery Submodel	(5)
3. Economic Losses Submodel	(6)
4. Integrated Multiobjective Planning Model	(8)
III. Methods of Solution	(8)
1. Solution Method for Deterministic Multiobjective Model	(8)
2. Solution Method for Models with Uncertain Parameters	(10)
3. Grey Multiobjective Programming Method	(12)
IV. Data Collection and Analysis	(13)
V. Discussion	(15)
VI. Summary Remarks	(15)
(15)	
References	(16)
