**Integrated Environmental Planning
for Sustainable Development
in the Lake Erhai Basin**

Volume 2: Model Summary and Results

Prepared for

United Nations Environment Programme

October 1997

CONTENTS

1. SYSTEM DESCRIPTION AND ANALYSIS	1
1.1. Interactive Relationships between Different System Components	1
1.2. Dynamic Feature of the Study System	17
1.3. Multiobjective Feature of the Study System	20
1.4. Uncertain Feature of the Study System	20
1.5. Summary	20
2. SUMMARY OF MODELING APPROACHES	22
2.1. Systems Approach	22
2.2. Inexact Multiobjective Optimization Approach	22
2.3. Systems Dynamics (SD) Model	26
2.4. Environmental Supporting Capacity	27
3. RESULTS FOR ENVIRONMENTAL PLANNING	28
3.1. Data Investigation, Analysis and Management	28
3.2. Results Interpretation	28
3.3. Results from IFMOP, SD and ESC Models	30
3.4. Generation of Decision Alternatives	67
3.5. Implementation	71
4. CAPACITY CONSTRUCTION FOR REGIONAL ENVIRONMENTAL MANAGEMENT	73
4.1. Training of Highly Skilled Personnel	73
4.2. Computer Hardware and Software	73
4.3. Construction of Environmental Management Information System	74
4.4. Automatic Environmental Monitoring System	74

5. CONCLUSIONS	75
5.1. Summary	75
5.2. Major Contributions	77
5.3. Potential Extensions	78
