**Integrated Environmental Planning
for Sustainable Development
in the Lake Erhai Basin**

**Volume 3: Annex for Full Text of
Environmental Planning Models and Results**

Prepared for

United Nations Environment Programme

October 1997

CONTENTS

1. LITERATURE REVIEW	1
2. DESCRIPTION OF MODELLING APPROACHES	4
2.1. Systems Approach	4
2.2. Inexact Multiobjective Optimization Approach	4
2.2.1. Model for Lake Erhai	4
2.2.2. Optimization Approach	7
2.2.3. Method of Inexact-Fuzzy Multiobjective Linear Programming	8
2.2.4. The IFMOP Model	11
2.2.5. Illustrative Example	21
2.2.6. IFMOP Modelling Formulation for Environmental Planning in the Lake Erhai Basin	27
2.2.6. Characteristics of the IFMOP	38
2.3. Systems Dynamics (SD) Model	42
2.3.1. Concept of Systems Dynamics	42
2.3.2. Characteristics of Systems Dynamics Model	43
2.3.3. Modelling Approach	43
2.3.4. Test of the SD Model	52
2.4. Environmental Supporting Capacity	58
2.4.1. Selection of Indicators	58
2.4.2. Description of the ESC Modelling Approach	59
3. RESULTS FOR ENVIRONMENTAL PLANNING	61
3.1. Data Investigation, Analysis and Management	61
3.1.1. Input Parameters for A_{\pm} and C_{\pm} Matrices	61

3.1.2. Input Parameters for B± Vector	63
3.1.3 Existing Patterns of Human Activities	63
3.1.4 Data Management	64
3.2. Results Interpretation	64
3.2.1. Presentation of Results	64
3.2.2. Inputs/Outputs Verification	65
3.3. Results from IFMOP, SD and ESC Models	66
3.3.1. Solutions from the IFMOP Model	66
3.3.2. Solutions from the SD Post-Modelling Analysis	75
3.3.3. Interaction between IFMOP and SD	82
3.3.4. Analysis of Environmental Supporting Capacity (ESC)	88
3.3.5. Water Quality Management for Lake Erhai and Xier River	88
3.4. Generation of Decision Alternatives	105
3.4.1. Tradeoff Analysis	105
3.4.2. Recommended Alternatives	107
3.5. Implementation	109
3.5.1. Implementation of the Planning Schemes	109
3.5.2. Reflection of Dynamic System Features	110
4. CONCLUSIONS	112
REFERENCES	117
