

MODEL FOR CALCULATING EMISSION FACTOR FOR ENDOSULFAN

**Deliverable – 1:
Detailed Plan for Development of the Pesticide Emission Model**

Submitted by

B. Chen, G. H. Huang, and Y.F. Li

CONTENT

1. INTRODUCTION	3
2. LITERATURE REVIEW	7
2.1 CANOPY MODEL DEVELOPMENT	7
2.2 CANOPY VOLATILIZATION MODEL	9
2.3 CANOPY PHOTOCHEMICAL MODEL.....	12
3. METHODOLOGY	14
3.1 PROPOSED CANOPY MODEL	14
3.1.1 <i>Model Description</i>	14
3.1.2 <i>Time Stepping</i>	21
3.1.3 <i>Evapotranspiration</i>	24
3.1.4 <i>Input Parameters</i>	26
3.2 PESTICIDE EMISSION MODEL	35
3.2.1 <i>Soil Model for Simulating Transport of Pesticide</i>	35
3.2.2 <i>Combination of Canopy Model and Soil Model</i>	44
3.3 DETERMINING EMISSION FACTORS	45
3.3.1 <i>Emission processes</i>	45
3.3.2 <i>Emission Factor Computation</i>	46
3.4 UNCERTAINTY AND RISK ASSESSMENT	50
3.5 DECISION SUPPORT SYSTEM	52
3.6 GIS-AIDED MODELING STUDIES.....	56
3.6.1 <i>GIS as a Tool for Spatial Data</i>	59
3.6.2 <i>Subdivision of study region into Modeling Units</i>	60
4. CASE STUDY	60
4.1 THE GREAT LAKES WATERSHED	60
4.2 APPLICATION SITUATION OF PESTICIDE IN THE GREAT LAKES.....	61
4.3 DATA COLLECTION AND MODEL APPLICATION	64
5. SUMMARY	65
6. REFERENCES	67
