

Preliminary Study of Risk Management for Natural and Human-Induced Water Safety Issues for the City of Regina

Progress Report

Submitted to Communities of Tomorrow
Seed Project Program

By

Gordon Huang, Xiaosheng Qin, Renfei Liao
Faculty of Engineering, University of Regina

June 30, 2007

Contents

Tables and Figures	3
1. Project Objective.....	4
2. Accomplished Activities.....	4
2.1. Literature Review.....	4
2.2. Data Investigation and System Characterization	6
2.2.1. Water systems in the City of Regina.....	6
(A) Water Supply System	6
(B) Water Distribution & Sewer System	7
(C) Water Quality	8
(D) Safe Drinking Water Strategy	9
2.2.2. Review of Historic Human-Induced and/or Natural Disasters in Regina and Other Canadian Cities	10
(A) Terroristic Events	10
(B) Natural Disasters in Regina	12
(C) Global Spread of Diseases (GSD) through Water Bodies.....	12
(D) Accidental Discharge of Industrial Effluent.....	13
2.3. Policy Analysis on Risk Management.....	14
2.3.1. Knowledge Acquisition through Public Survey	14
(A) Identification of Fuzzy Evaluation Criteria for Risk Quantification..	14
(B) Determination of General Risk Levels and Rule Base for Risk Management.....	19
2.3.2. Review on Multi-Criteria Decision Making (MCDM) Techniques	21
2.3.3. MCDM-Based Policy Analysis.....	22
(A) SAW	23
(B) ELECTRE.....	23
(C) TOPSIS.....	24
3. Further Research Works	25
References.....	26
